Olli draws you in

Olli by Tinrocket gives life to your artistic vision by turning everyday moments into beautiful and poetic animations and drawings.

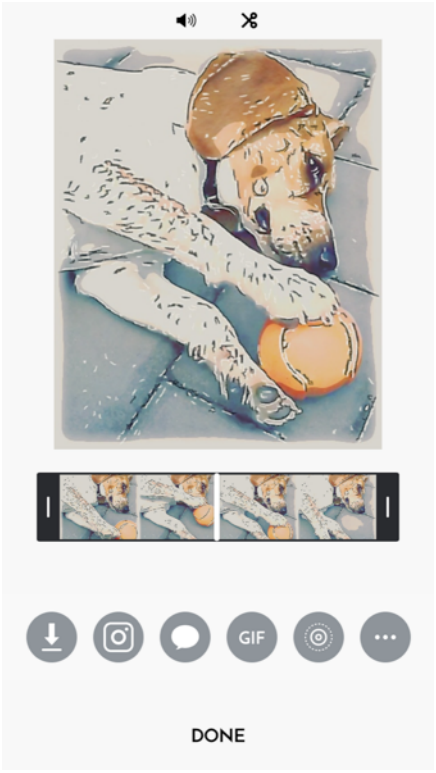

Rather than using a filter on your captures, Olli's unique technology mimics the way artists see and draw.

Whether you are taking snapshots of friends or documenting a beautiful scene on your way to work, Olli's authentic and hand-drawn detail is captivating. It surprises and delights by turning snippets of everyday life into pieces of art.

Simple, spontaneous, and fun live preview

"We designed the app for optimal simplicity to keep things spontaneous and fun. Olli's live preview immediately draws you in, transforming your world into an animated adventure, with its story unfolding before your eyes. It's like holding a TV in your hand," says Tinrocket founder, John Balestrieri.

Create, share and connect

Once you create your drawings and animations, Olli makes it simple to save them to your phone, share with friends and family, or post to social media.

Olli by Tinrocket ships with six fun styles, each designed to bring a beautiful, storybook quality to your work. In addition to the included styles, Cinema, Swiss, and Mercury, three supplemental stye packs, are available for in-app purchase. Cinema is currently free to download, for a limited time.

Download Olli by Tinrocket and get drawn in.

Olli by Tinrocket for iOS feature set:

- Simple, engaging and fun to use
- Captivating live preview lets you see the world like an artist
- Capture still images or up to 10 seconds of video or GIFs
